**We welcome your questions  
throughout the session!**

**To start off in a good way, we  
are sharing the following  
Land Acknowledgement**

# SWB Events at JSM

- Panel Presentation: Monday, 8:30am ← ***you are here!***
- SWB In-Person Meeting: Tuesday, 3:00pm ← ***tomorrow!***
- SWB Virtual Annual Meeting: Tuesday, August 15, 3:00pm EST
  - To register, email [Matthew.W.Brems@gmail.com](mailto:Matthew.W.Brems@gmail.com).

# What should you expect today?

- 1. Introduction to Statistics Without Borders** (David Whitford)
2. IMPACT Initiatives: Project Lifecycle (David Whitford)
3. Global Count Women's Right Org Directory (Dr. Michiko Wolcott)
4. Social Media Sentiment Analysis (Dr. Michelle Vanchu-Orosco)

# What is SWB?

- **Started in 2008** by Steve Pierson, Gary Shapiro, Jim Cochran, Fritz Scheuren
- **Mission:** Statistics Without Borders (SWB) is committed to providing statistical services to organizations to maximize their positive impact on society.
- **Vision:** SWB envisions a world in which everyone has access to statistical expertise and uses that expertise to positively impact our world.

# We're organized in three main groups.

# How can I get involved?

**Find a  
vacancy!**

Current:

- Networking Coordinator
- Content Developer
- Newsletter Developer
- Web Developer
- SharePoint Administrator
- Data Analyst

**Reply to  
“Calls for  
Volunteers”**

When **any vacancy opens up** (permanent roles or project-specific), we send a “call for volunteers” via email.

**Register to be  
a member!**

In order to receive emails, you have to register to be a member (and opt into receiving emails from SWB).  
**Fill out an application!**

**Know a non-profit that could benefit from free data/consulting work?**

**Have skills & want to volunteer on projects around the globe?**

**Want to hear about the impactful projects we do on social media?**

**STATISTICS WITHOUT  
BORDERS**

to me ▾

Hello Joshua,

The Greater Victoria Coalition to End Homelessness (GVCEH, the Coalition) was formed in 2008 with a mission to end homelessness in the capital region. GVCEH is looking to build a tool that uses Sentiment Analysis to analyze information on social media/news posts by tone (positive, neutral, and negative). As this was previously done in a labor intensive way, the new tool also allows GVCEH to reduce subjective biases and standardize the methods and processes. If GVCEH understands where the information comes from (positive, neutral, and negative) strategies to target communities to change the narrative become possible.

SWB help is sought to perform Sentiment analysis based on Twitter and Reddit posts, find a way to quantify attitudes and impact of interventions, and integrate them into a beginner-friendly graphical user interface.

We are looking for 6-8 volunteers with experience with: technical team leadership, client interview and co-design of dashboards, web scrapping data collection, natural language processing (sentiment analysis), and time series data analysis.

**Project duration:** 20 weeks. **Expected workload:** 6-8 hours per week

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Milestone 1: The initial Deliverable

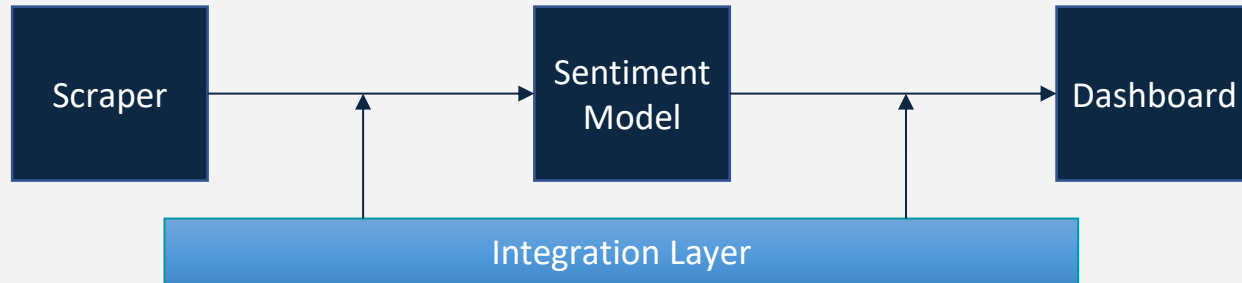

### Scope

- Perform Sentiment Analysis based on Tweets using provided names and keywords
- Architecture decisions
  - Pipeline
  - All Python
  - Free

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Process Pipeline

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## The Scraper

- SOW defined keywords to collect relevant tweets
  - About People Experiencing Homelessness
  - In Victoria, BC (Capital Regional District)
- Python: Tweepy Package (Twitter API) & Pandas
- Collected Additional metadata on tweets
- No substantive geo/location data available
- Stored as CSV files

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Keyword Logic (Subject)

### About Homelessness + IN Victoria

#### Organizations

- District of North Saanich
- District of Saanich
- Downtown Victoria Business Association
- Fernwood Community Association
- Foundry Victoria
- Greater Victoria Acting Together
- ...

#### Sectors

- Harm Reduction
- Safe Supply
- Service provider
- Frontline
- front line
- frontline worker
- front line worker
- ...

#### Words

- Poverty
- Poor
- Crime
- Violence
- Thief
- Theft
- Camp
- Camping
- ...

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Keyword Logic (Region)

About Homelessness + IN Victoria

### Neighbourhoods

- Colwood
- Langford
- Metchosin
- Sooke
- View Royal
- Esquimalt
- ...

### Region Identifier

- Greater Victoria  
(#GreaterVictoria)
- Victoria
- VictoriaBC
- Victoria B.C.
- #YYJ, #GVCEH
- Greater Victoria Coalition  
to End Homelessness
- ...

### Influencers

- @BC\_Housing
- @Island Health

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Scraper Challenges & Solutions

- Limited Twitter / API support
- API Restrictions
  - 7 Day History
    - Routine collection
  - Limited # of requests per 15 minutes
    - Batch Scraping
    - Boolean Keyword Logic
    - `time.sleep(2.5)`

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Example Tweets

Date	Tweet
2023-02-16 03:25:58.335608	<b>@CityOfVictoria</b> former houseless <b>encampment</b> needing attention. Located waterside of Galloping Goose near FolEpi and Dockside Green. Butane/propane canisters and debris.
2023-02-16 03:32:04.920188	Our team will be out tonight with hot soup/ Bannock, <b>harm reduction</b> , coffee cards etc . We help folks connect with service providers such as housing applications specifically M'akola housing , detox, stabilization. As always thank you <b>Victoria</b> for supporting our work.
2023-02-17 03:34:27.066345	<b>@DesmondCole</b> I imagine it's the same story all across Canada. I live in <b>Victoria</b> and I can't even fathom the stats about <b>homeless</b> people here. How many there are, how many are sick and disabled, and how many have died from the negligence of those that are supposed to be helping them.

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

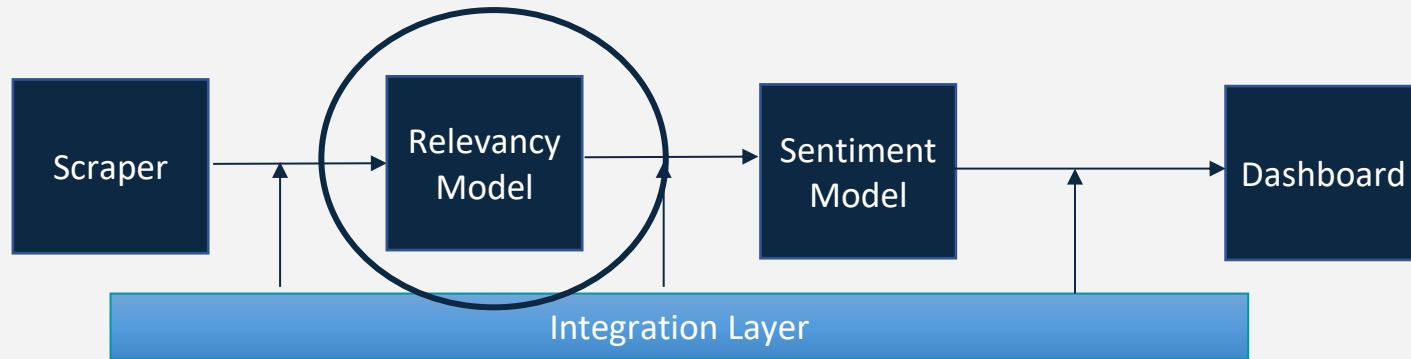

## The Sentiment Model

- Hugging Face Transformer (Python Library)
- Off-the-shelf, trained on Twitter data, can run offline
- Assigns Positive/Negative/Neutral Label
- Pre-processing Concerns
- Team verified output; results were accurate

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## Process Pipeline Updated

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

A pivot – Relevance Model (Phase 2)

## Why did this happen?

Words have multiple meanings  
Victoria: City in Australia, Name  
Central Park: New York City  
Pandora: Music service  
Experimented with refining list  
Experimented with keyword  
filter

## Hand Verification and Analysis

Hand labelled 3,000 tweets  
About Victoria: Yes or No  
About People Experiencing  
Homelessness: Yes or No  
Grey Area: Homelessness vs  
Housing  
Two Rounds with updated keywords  
Determined initial “relevancy”

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

The results...

	precision	recall	f1-score	support
0	0.96	0.95	0.95	75
1	0.90	0.93	0.91	40
accuracy			0.94	115
macro avg	0.93	0.94	0.93	115
weighted avg	0.94	0.94	0.94	115

# Social Media Sentiment Analysis: Using Python to Help the Unhoused

## The Dashboard

App Built & Hosted by Streamlit

Simple to use → best option

Free, open-source, python-based framework

Main Functions:

Fetching/Summary data

Filtering in Dashboard

Download data
